

Video 37: New Important Playlist on our Channel (Transcript)

by Wes Penre and Ariel Glad, July 5, 2018

As Ariel and I are continuing with the research for our YouTube Project, we are sometimes stumbling upon other researchers' videos that are highly relevant to our current and future work. Some of them we consider being very important for our viewers to watch in addition to our own videos, for different reasons.

Such particular videos that we think stand out in such a way that it's not enough to mention them in OUR videos, we will from this date forward put on a separate Playlist on our channel. This Playlist is called, "Important Related Videos from Other Researchers." We have posted the first video there today, and hopefully as many visitors as possible will have time to watch it. It's all in line with what is discussed in the Wes Penre Papers and the Singularity book that was written after the WPP were finished.

So, please check out our new Playlist now and then to stay updated with new future videos! They will hopefully give us all an even bigger picture of what is going on, what's being planned, and what consequences it might have. These videos can be on any subject Ariel and I are discussing in our own videos.

In this first video, which is about CERN, many occult names are mentioned, such as Shiva, CERNunnos, and Apollo. They are all names for the same god—Marduk. This was carefully covered in the WPP. The ABZU, also mentioned in the video, is the Abyss where En.ki and his rebels dwell and are trapped, i.e. what Ariel and I look at as the Second Dimension, very close to our own 3rd Dimension. Rev. 9 in the New Testament is mentioned in the video, as well, and we strongly suggest you read this Bible passage to understand what is going on at CERN.
