

Video 147: Q&A Session #27

Written by Wes Penre and Ariel Glad, May 9, 2019

This is a transcript to video:

h

Thank you for all wonderful response we've got from our "BIG PICTURE SERIES!" Now it's time for a Q&A session again. Please send more questions to wespenreproductions@gmail.com .

QUESTION 1: Several videos ago you mentioned researching a direct route to the Pleroma after death, bypassing the KHAA. Based on video 146 (around the 19 minute mark), it now sounds like that isn't a possibility. Is that correct? I assume you haven't gotten any confirmation about that possibility from your recent research, or from your anonymous sources. Can you provide more details on this?

ANSWER: We realize that this has created confusion and we apologize. When we began to create this video project it came about as a desire to explore if the KHAA was the stopping point/highest existence for humans or was there something more? For those of us who are repelled by the concept of conflicts and conquests, was there a realm of existence where one could choose to create in peace and harmony rather than keep a constant eye toward defensive and offensive survival? When we discovered that the KHAA was actually a boundary portion within something much more expansive and whole – the Pleroma – we felt that we had our answer and a realm of existence to which we were a match and we could hope to achieve.

The KHAA will most certainly be our first encounter when leaving the Earth construct – for all of us. Must we stay within this VOID or may we progress further? We feel, now, that we may have the option to progress “out” of the VOID/KHAA if it is appropriate for us.

At the time we made that video, we even considered if we could skip the KHAA/VOID, with its seeming wars and endless quests for domination by star beings with whom we have no interest in engaging, entirely and progress directly to the state of existence we desire. We don't have the answer to that. We can only speculate, of course, and no one really knows anything until we experience it and regain our full awareness.

QUESTION 2: If the KHAA/VOID is the nanoworld and Tiamat was from the VOID and our Patrix is the Atom World, how it is possible that Tiamat/the remains of Tiamat is/are very large compared to Earth, those on Earth, and also if you can explain briefly if present Earth is entirely outside of KHAA or a piece of it in quarantine?

ANSWER: Good question! It's true that the KHAA is the nanoworld, i.e. the micro-cosmos, seen from our perspective, and we live in what is called the macro-cosmos. And that's exactly what it is—perspective and perception. En.ki “super-imposed” the Patrix (our Construct), so one would think that everything is smaller in the KHAA. However, it has to do with relative sizes. If you were back on Tiamat right now, the way it was before it was destroyed, everything would appear larger because then you would be part of that reality and mingle with it. Thus, relatively speaking, things would appear larger. It's not that our Construct is literally larger, but from our perception/perspective it is—here, everything is inverted. And, like scientists sometimes point out, the mystery is that atoms are empty—there is nothing there. It's all an illusion. Our present Earth is inside the KHAA—quarantined and re-constructed.

QUESTION 3: What is our next step after leaving the matrix? You indicated we could go straight to the gates of the Orion Empire and ask for the Queen. Why would we want to go to the gates of Orion, unless we are in fact forever subjects / enslaved by the Queen? Do we have any real autonomy, free will or positive choices once we escape?

ANSWER: What our/your next step will be is of course up to you. You can explore the KHAA, if you like, or you can go to Orion and get debriefed and educated, or you can explore first and THEN go to Orion, if you like. You can even skip Orion altogether—anybody's **choice**.

We have never said that we are, or will be, enslaved by the Queen. This is an assumption that does not come from us. And yes, we will have freewill and freedom to create. We can make the choices we want when we're out of here.

Once we leave this Earth construct, we will no longer have our blinders on, and we will have gained our full memory. Your perspective about who the Queen is might change. We are not Her subjects, as you indicate. We are Her children in the same way that human children are offspring of their parents and not enslaved subjects. Yes, we have real autonomy, free will, and positive choices. Residing within the Orion Empire gives us an incredible amount of security against other star beings in the KHAA whose evolutionary path have them engaging in conflicts, but if you would choose to go out and take your chances to mingle with them, you are certainly free to do so.

To your next question:

QUESTION 4: I'm curious to know what you think about the Ankaraman channel video with Claudy Stockman, a universal seer who met with the Queen? She assessed the Queen as being arrogant, indifferent to our plight and complicit in human emotional abuse and child torture. Enki and the Queen are 100 ft. tall snake headed lizard reptilians, who refer to humans as Lu Lu's or dumb animals with less significance than ants.... Enki created us for slave labor and food to which the Queen continues to receive benefit. What if anything will or has changed this paradigm?

ANSWER: We know that there are people who are looking into Claudy Stockman and the NU-U movement right now, and we have also checked it out because we were curious about it. Our question back to you is: how do you know she met with the Queen? Is it only because she says so? For us, it's even enough with a quick glance at their material to see that she has never met with

the Queen, although we did look deeper than that. It's all made up. This is a cult, in our opinion—a dangerous one, too, because they prevent people from getting free. There is no doubt that Stockman and her team have read the Wes Penre Papers (WPP), or she wouldn't even know any of the stuff she's talking about. Regarding snake-headed lizards and that En.ki created us for the benefit of the Queen is fabricated. The whole movement smells Intelligence Agency to us—their way of countering the information we're putting out. It's not even professionally done, with the cartoons and photoshopped ludicrous pictures—some of them showing “Duane, the Great Writer” (what???) with a buttoned-down shirt and his young female assistance with huge breasts. C'mon! Please use discernment, folks. We usually don't say things like this because we respect other people's research, even if it doesn't coincide with ours, but the NU-U movement has nothing to do with research—it's just slander and cult-making for gullible people, so this needs to be said—particularly if we consider it right out dangerous, putting truth-seekers' freedom at stake.

QUESTION 5: To gain access to the Pleroma are we to think ourselves there once we pass on? Would you suggest we go there or to the Khaa? Which is the best place to head to?

The latest information is quite convoluted; please help decipher which is the best way out of this construct. You mention that upon death, all we do, is to look up and we shall see the holes through the grid and see the Khaa as a beautiful lit up environment; is the Pleroma the same?

ANSWER: As in the first question and answer, the KHAA is within the Pleroma since the Pleroma is the fullness of all creation. The first environment we will encounter when we leave the Earth matrix will be the KHAA. However, as stated before, conflicts do exist within the KHAA because the KHAA contains many different star beings who were created for various intentions and at varying levels of evolution in their development.

These are realms of existence that coincide with levels or states of being, from what we can interpret, not pinpoint locations on a map. As we develop higher and higher, we grow and expand beyond the need to engage in these types of

conflicts for our own development. We can't say what this type of existence may be, either within the KHAA or the Pleroma, as we do not have memory of existing in either realm. However, this is our origin and we assume that when it is appropriate and we have managed to overcome the limitations we have acquired here, we will find the appropriate realm that fits our needs for **expansion**.

The best way out is still the same and has not changed. We apologize for the confusion this may have created. When we began this series, we thought that the KHAA was the end/stop for our Spirit destination. There are those of us who do not wish to be involved or even co-exist with beings who engage in conflicts and conquest. We were pleased to discover that there seems to be something more for those of us who find this intention more desirable.

If we are currently residing on the first floor of an apartment building, the KHAA would be the entire building. The Pleroma would be the world that the building is in, not only that one building, but all the buildings, streets, city, state, country, continent – everything. While advancing to a higher level within the building would be great, we would like to leave the building all together and explore the world, or maybe find a different building in another country, if possible. That is the concept we were trying to present.

In the BIG PICTURE SERIES, and we also compared the Pleroma with the Divine Feminine in the later releases in the series. What Nag Hammadi calls the Pleroma is, as we see it, the same as the All That Is, aka Source, aka the Divine Feminine. In other words, it's everything that exists. This means that we are in the Pleroma right now and we ARE the Pleroma at the same time because we're part of it. What we experience in the Pleroma depends on from which dimension we are observing it and interacting with it.

We still emphasize that the most efficient and easiest way out of here is through the Grid. We then enter the KHAA, and from there, we can decide what we want to do and where to go. Personally, as we see it now, Ariel and I will head for Orion to educate ourselves.

QUESTION 6: Have you considered that the electromagnetic spectrum holds some hint on the current limitations and the actual limitlessness of each point of attention that is called human on this density? The visible light is our current prison, even then we are limited to 'black' colour (physical body). 'Purple' (celestial body) being the highest density in the visible light frequency.

ANSWER: Yes, “visible light” is just a super-tiny part of the electromagnetic spectrum, and that’s where we are stuck right now, being within these very limited bodies—including the false light-bodies the Overlords have provided us with. The light-bodies correspond, more or less, with the different colors of the chakra system, so we agree with what you’re saying.

QUESTION 7: Please, can you tell me the title of the background music that starts the each video. I keep repeating the beginning of the video just to listen once more. Thank you.

ANSWER: Many people have asked us about this song. We chose it because we like it, too. It’s a composition, particularly created to be used for YouTube and other media. It’s copyrighted and can’t be used for commercial purposes, unless we put the artist’s name and the title in the Description box. It’s called “A Ghrà” by Damiano Baldoni. This song, and other songs of his, can be downloaded for free from the “Free Music Archive” (FMA) online. The URL will be in the description box below¹.

QUESTION 8: Are you aware of the work/research done by Boogie Man? He has a channel on youtube and on one of his recent videos he shows his discovery about [a] visible grid.... Is it possible to see it with the right equipment? Is there a possibility that the grid is having some flows/errors so we can see it as on movie Truman Show?

ANSWER: We’re not familiar with Boogie Man, but we’ll try to answer the question anyway. It is theoretically possible to detect the Grid with technology—

¹ http://freemusicarchive.org/music/Damiano_Baldoni/Lost_Dinasty/A_GhrO

it depends on what technology is being used. Can human scientists detect it with their current level of technology? We don't know. The "wall" Truman bumped into in "The Truman Show" was more likely the Firmament, as we see **it**.

It has been suggested by some who are skilled at OBE and a few scientific organizations that they have encountered a boundary of some type and if you search hard enough, you might even find a little bit of documentation or personal witness accounts describing it.

QUESTION 9: What is your opinion on soul age? Young souls are desperate to live the life to the full, but old souls tend to be more passive and are longing to get back to "the source". Does it mean that with every incarnation, there is some amount of experience still available to old souls (not forgotten)? Does this concept mean that with every incarnation we know more about the world (matrix)?

ANSWER: There is much disinformation on old and young souls. We, who are spirited beings (Namlu'u—the primordial humans), are all of the same age—soul-wise (Spirit is ageless and not part of time/space). There are older and younger souls trapped here, as well, like we said in THE BIG PICTURE SERIES, but they are not human. It's the true human soul group, who are all spirited, who want to "go home," so to speak, while those who are not spirited generally don't have the same urge and curiosity, although *some* of them might have. It seems like the souled, but non-spirited beings have an easier time to adapt here. We don't necessary become wiser because we reincarnate over and over, although some might. Before each incarnation our memories are wiped out, so we virtually need to start from scratch, more or less. So, the only "new souls" that are created here in the Patrix are the ones En.ki creates artificially.

QUESTION 10: Still thinking of The Forbidden Religion book: If body and soul are of the demiurge, is it Spirit the only thing that is "real"? What if everything

we hold as "sacred," like our souls and all within in it, are not ? What if LOVE is the ultimate drug that the demiurge (maybe ourselves, too, in "the game") has been given to us?

ANSWER: The only thing that's fundamentally real is Spirit because She is coming directly from Source—the Divine Feminine. The rest is creation, including souls, which are composed of energy (bioelectric fires). And energy can be dispersed, while Spirit, residing outside space and time, can't. Love is real and a part of Spirit, but the Demiurge/En.ki is using this very powerful and fundamental life-force against us. He is sampling it from us and casting it back on us, using it to lure us in.

In our opinion, this was not a gift given to us by En.ki. Love is a vibration or a state of being through which we think and act. It is through love that we nurture, express compassion, affection, generosity, gentleness, and joy. These are qualities of the Spirit and our Spirit was not created by En.ki.

QUESTION 11: If we do not truly know who we are or what we can do, then what can we use to read the age-old deception within ourselves and acting on us?

ANSWER: It's a journey. It starts with a yearning to know the truth, with a feeling that something is very wrong here. Then, we start investigating, and we learn more and more about this Patrix and about ourselves. We peel off the layers of the onion. It's all a matter of educating ourselves—researching and pondering, then researching more and ponder again, putting the puzzle together. Then, at one point or another, we realize that we are Spirit, using a soul to interact with the KHAA and an artificial soul to interact with the Patrix. First, we understand this concept in theory, until suddenly, we transform and will be able to distinguish between the Spirit, soul, and artificial soul within ourselves. Theory then becomes Knowingness, and once we EXPERIENCE that we are spirited, there is nothing that can shake that knowingness. It would be like if your name is John and someone says it's NOT John—it's Mary. They might try to convince you forever, but you won't buy **it**.

There are many places to get this information and most of it will come from inside you. You already know who you are and what you can do, you just need to have the confidence to trust your answers and know what your own inner voice/Higher Self sounds like. By this, we don't mean literally, but rather we mean that your Higher Self will not berate you, make you afraid, or invalidate you. If you are hearing those types of inner monologues, those were put there by someone else. We don't have a natural tendency to hurt ourselves unless someone has convinced us that it is acceptable to do so.

Begin to ask questions and then start paying attention to any answers or new opportunities that come along. If your intentions are sincere and you are willing to learn, you will know more and more about yourself.

QUESTION 12: You have said that when we leave the matrix/patrix, we leave at the level of vibrational progression (my interpretation of what you say in this regard) of where we are at in this life at the time of exiting. But you have also said that we shed a lot of negative attributes about ourselves that make us vibrate at low frequencies once we enter the Khaa. Such as ego type things that would make us feel outrage, jealousy, insulted, shamed, etc.

So, if we shed these aspects of ourselves when we leave the matrix/patrix, then aren't we going to automatically become a better person (soul/personality) in general and automatically start vibrating at higher levels once these [Alien Invader Force] AIF induced low vibrational aspects have been shed? If we shed these, then won't we be more of the high vibrational raw spirit that we truly are and less of what we are just before the time of exiting -- when the low vibrational aspects of ourselves are still attached? If so, then I am confused when you say we will be at the same vibrational level (again, my interpretation of what you say in this regard) that we are currently at when we exit into the Khaa. Because it seems to me that we won't be if we shed all the "yuck" upon entering the Khaa and that we will automatically be "better" (vibrating higher without these aspects of ourselves). Can you clarify please?

ANSWER: Great questions! Yes, it's true that when we shed our artificial soul and light-bodies, what remains are the Spirit and original soul/avatar. These two

aspects are of higher vibration than what humans currently possess. The problem is that we bring our beliefs with us. What we've been manipulated to believe here on Earth has then been transferred from the artificial soul construct (artificial soul and light-bodies) to the real soul, and even to Spirit, which both have absorbed this as truth. This together has become people's false reality. So, if we let all these ignorant Spirit-soul constructs (humans) out into the KHAA in the shape they're in right now, they will enter with the Overlords' manipulative belief systems included—that's their reality. All these souls would be utterly confused and resistant, and they would need to be un-learned and re-educated. This is the reason why it's important to learn as much as possible while still here because the better off we are before we exit, the easier it will be when we're in the KHAA.

In other words, we shed the mechanism that was added to us that allows us to be abused – the artificial soul suit. Currently, our understanding is that the memory and effect of that abuse is still collected and retained by the original soul. We will leave here with all that we have learned through our experiences here. We might gain more awareness or gain a different perspective once we are free, but this won't be a magical "cure all". We won't be affected by the yuck anymore, because we will leave that abuse system behind, but the effect that the yuck created within our original soul might still be present. We might have a hard time trusting our surroundings. We might be afraid. We don't all automatically turn into angelic beings once we are out of here. We leave at our current level of development. It has been indicated that some type of help or assistance may be necessary or offered once we get out, and this implies that they don't expect us to come out undamaged. It has also been indicated that we will experience what we expect to experience. We can leave that for each of you to ponder and interpret, just as we have.
